

PLANNING TOGETHER FOR THRIVING COMMUNITIES

As we prepare to update our 10-year Comprehensive Plan in 2017, we are focusing on how we can integrate our water resources work with public and private partners to achieve better outcomes for all. **Please join us for breakfast and discussion on how we can align plans, policies and investments** to maximize environmental, economic, and social outcomes for the communities we serve.

Ben Landhauser (*Community Development Director, Victoria*) and Sean Walther (*Planning and Zoning Supervisor, St. Louis Park*) will share their experience and ideas about how collaborating with the District can add value to City planning and projects. **We want to hear your ideas for how we can work together** to align policies, share information and integrate investments through various types of planning, including area-wide planning, infrastructure investments, capital improvements plans and site development.

JOIN US!
