

**APPLICATION CHECKLIST FOR SAND BLANKET PERMITS**

Materials required for all SAND BLANKET permits are in the box below. Projects triggering other rules may require additional materials.

- SAND BLANKET APPLICATION FORM (electronic signatures accepted)
- SITE PLAN
- CALCULATION OF CUT AND FILL
- \$10.00 APPLICATION FEE (Payable to MCWD by check or Visa/Mastercard)

PLEASE SEE CHECKLISTS BELOW TO ENSURE YOUR APPLICATION IS COMPLETE

The sandblanket application form and rules applies to sand placed below the Ordinary High Water Elevation. Sand placed between the Ordinary High Water Elevation and the 100 year flood elevation is subject to regulation under the Floodplain Alteration Rule.

SITE PLAN including:

- Property lines
- Location and dimensions of existing sand (if applicable)
- Location and dimension of proposed sand
- Existing elevation contours of the work area
- Ordinary high water elevation (OHW)¹
- 100 year flood elevation²

PROFILE, CROSS SECTION OR TOPOGRAPHIC CONTOURS including:

- Existing elevations in work area
- Proposed elevations in work area

¹ The OHW for Lake Minnetonka is 929.4, for other lakes visit dnr.state.mn.us/lakefind. For streams the OHW is defined as the top of bank

² The 100 year flood elevation for Lake Minnetonka is 931.5. For other waterbodies, visit msc.fema.gov or contact permitting staff
