Summary:

Under Minnesota Rules Chapter 8410, the Minnehaha Creek Watershed District (MCWD) is required to revise its Watershed Management Plan every ten years and must establish an advisory committee, committees, or other means of public and technical participation for the purpose of making recommendations on its Watershed Management Plan.

In [December 2024](#), the Board adopted the 2027 Plan Framework, which carries forward MCWD's Balanced Urban Ecology (BUE) vision and focus on integrated planning and partnership. The scope of work for the 2027 Plan is organized around four areas:

- *Subwatershed Planning*: developing tailored, actionable implementation plans for each subwatershed
- *Land and Water Partnership*: creating policy tools and best practices to support integrated planning
- *Flood Management Strategy*: assessing flood risk and mitigation strategies to establish a regional framework
- *Metrics of Success*: building an evaluation framework to measure and communicate progress

The 2027 Plan will be developed through a multi-year, collaborative process led by MCWD staff and supported by a consultant team that will provide additional capacity and expertise for both the technical and engagement work. For its advisory committees, MCWD will utilize its existing Citizen Advisory Committee and establish both a Policy Advisory Committee (PAC) and Technical Advisory Committee (TAC). The MCWD will convene the PAC, TAC, and subwatershed planning groups over the course of 2026-2027 to bring together regional and local perspectives across the watershed to inform plan development, improve integration, and strengthen relationships.

Interest in serving on the advisory committees was solicited through the kickoff mailing, the January kickoff event, and follow-up email requests. Below is a summary of the intended audience and expected time commitment for each committee:

Policy Advisory Committee:

- Council members, board members, and administrators from municipalities, counties, park and conservation districts, and plan review agencies
- 5-6 meetings total over next 2 years, scheduled around members' availability

Technical Advisory Committee:

- Planning, engineering, natural resources, public works, and community development staff from municipalities, counties, park and conservation districts, and plan review agencies
- 7-8 meetings total over next 2 years, scheduled around members' availability

There are 15 individuals who expressed interest in serving on the PAC and 24 for the TAC. Across the two groups, there is a strong mix of geographic representation, organization types, and roles. Staff is recommending appointment of all those who have expressed interest, as listed in the tables below.

For organizations that had more than one person interested, one has been designated as the primary representative with others proposed to serve as alternates. Alternates will receive all the committee materials and are welcome to attend the meetings and provide input. If other cities or organizations express interest in joining a committee at a later date, staff may request appointment of additional members at a subsequent Board meeting.
