Fund name and number: 54th Street Stream Restoration (300-3147)

Current Budget: \$4,081,971 Expenditures to date: \$1,433,996 Requested amount of funding: \$0

SUMMARY:

In 2016, the Board of Managers appointed an Investment Task Force to initiate planning to increase the volume of outside funds supporting MCWD's capital improvement program. With Board concurrence, the Task Force established the following goals:

- 1. Obtain ongoing supplemental funding (larger than one-time project specific grants) to implement landscape scale restoration and implementation objectives identified within priority focal subwatershed plans, such as Minnehaha Creek.
- 2. Increase one-time funding for specific capital improvements identified through responsive track planning.
- 3. Obtain one-time or ongoing supplemental funding for MCWD programs, historically funded through levy resources (land management, data collection, education and communications, permitting, operations)

Accordingly, staff continues to target one-time, project specific, supplemental funding for priority activities. Each year, staff evaluates the District's Capital Improvement Plan to determine which projects are well-positioned to apply for grant funding, and the Arden Park restoration project was identified as being aligned with the Hennepin County Natural Resources Opportunity Grant Program.

The Hennepin County Natural Resources Opportunity Grant Program provides non-competitive grants up to \$100,000 for projects that address an identified natural resources management problem or need and/or undertake assessments that directly lead to the siting of projects that meet common natural resource management goals. Evaluation criteria focus on projects proposing improvements to water quality, preservation or restoration of the County's natural resource corridors, greenways, and designated open spaces, or reduce erosion and sedimentation. Based on the combination of stormwater improvements and stream and upland habitat restoration planned for Arden Park, in October 2018 staff applied for funding to the Hennepin County Natural Resources Opportunity Grant program for work to be undertaken as part of the Arden Park project. After the submissions were reviewed, the project was selected for funding in the amount of \$32,500 based on Hennepin County's desire to fund as many worthy projects as possible.

As part of the application process, MCWD staff submitted a work plan detailing plans to construct stormwater infrastructure, remeander and restore the creek, and complete upland habitat improvements within the creek corridor. This work continues earlier successful creek, wetland, and riparian restoration along Minnehaha Creek in St. Louis Park and Hopkins, and further downstream in Edina and Minneapolis. It is the goal of MCWD and the City of Edina to engage in restoration from a systems approach and consider how to ensure discrete elements of the project align to attain maximum improvements to both habitat and water quality.

The grant program is administered on a reimbursement basis, which requires implementation documentation, a final report, and an operations and maintenance plan covering the life of the practice.

The grant agreement is effective from the date of contract execution through December 31, 2021 which aligns with the construction and warranty maintenance period for the Arden Park Restoration project.

Staff recommends the District Board of Managers approve the grant agreement and authorize its execution by the Board President.
