

MEMORANDUM

To: MCWD Board of Managers
From: Tiffany Schaufler
Date: May 20, 2019
Re: Item 12.1: Spring 2019 Water Level Update

Purpose:

At its May 23, 2019 Board of Managers meeting, staff will update the Board on the potential for spring flooding, current water levels, and internal preparatory measures the District has taken to prepare. In addition to internal coordination, the District has also been coordinating with the National Weather Service, Hennepin County Emergency Management, the U.S. Geological Survey, and all 29 of the District's communities to gather information and share information on flooding potential.

Background:

After the historic 2014 flooding across the watershed, the District memorialized protocols and procedures to implement during a future flood event. The District has begun to implement these procedures based on the National Weather Service's 2019 spring flood projections which showed a high flood risk across the state through May 2019.

If there are questions in advance of the meeting, please contact Tiffany Schaufler at 952-641-4513 or at tschaufler@minnehahacreek.org.
