

**Meeting:** Operations and Programs Committee

Meeting date: 7/9/2020 Agenda Item #: 4.1 Item type: Discussion

Title: 2021 Budget Discussion

Prepared by: Name: James Wisker

Phone: 952.641.4509

Email: jwisker@minnehahacreek.org

#### **Purpose:**

At the July 9, 2020 Operations and Programs Committee (OPC), staff will summarize the 2021 Workplan (attached) and seek feedback.

#### **Background:**

Following several years of strategic planning and organizational alignment, the Minnehaha Creek Watershed District (MCWD) is well positioned for fiscal year 2021. Following a series of budget planning discussions with the MCWD Board in April, May and June 2020, the District is proposing to support its \$14,701,269 budget with a flat levy (0% change) of \$9,675,993 (*Table 1*).

2021 represents the fourth consecutive year the District has been able to implement its mission with a flat levy. This is due in part to external revenue in the form of grants and partnerships, assigned fund balances for multi-year capital improvement projects, and fund balances for programs delivered under budget.

Table 1

EXPENSES	2020	2021	2020-2021 Δ	% Change
Operations	\$2,037,889	\$1,580,698	\$ (457,191)	-22%
Programs	\$4,600,757	\$4,405,171	\$ (195,586)	-4%
Capital finance	\$2,750,000	\$2,914,974	\$ 164,974	6%
Capital projects	\$5,961,531	\$5,800,425	\$ (161,106)	-3%
TOTAL	\$15,350,177	\$14,701,269	\$ (648,908)	-4%

REVENUE	2020	2021	2020-2021 Δ	% Change
Preliminary 2021 levy	\$9,675,993	\$9,675,993	\$ -	0%
Projects fund balance	\$2,371,820	\$3,544,786	\$ 1,172,966	49%
Programs fund balance	\$917,938	\$493,050	\$ (424,888)	-46%
Grants and partner funds	\$2,215,206	\$818,220	\$ (1,396,986)	-63%
Interest, permit fees, reimbursemer	\$169,220	\$169,220	\$ -	0%
TOTAL	\$15,350,177	\$14,701,269	\$ (648,908)	-4%

2021 REVENUE - EXPENDITURES Δ \$0

#### **2021 Budget Process:**

To plan for and assemble the 2021 budget, the Board of Managers has worked through the following process to date:

- April 23, 2020 Planning and Policy:
  - Discussed preliminary 2021 budget projections, reviewed Operations and Programs, and set process
- May 28, 2020 Planning and Policy:
  - Reviewed detailed budget of Programs, Operations, Capital Projects & Finance, and Personnel
- June 11, 2020 Operations and Programs:
  - o Refined detailed budget and reviewed strategic alignment
- July 7, 2020 Citizen Advisory Committee:
  - CAC review of the 2021 budget and workplan

### July 9, 2020 Operations and Programs Committee:

At the July 9, 2020 Operations and Programs Committee staff will provide a brief status report on the 2021 budget development, review the strategic alignment and 2021 workplan (attached), and take feedback from the Board.

#### **2021** Budget Development Next Steps:

Following the July 9, 2020 Operations and Programs Committee, the budget, workplan and strategic alignment will be reviewed a final time at the August 13, 2020 OPC Meeting, before a public hearing is held at the August 27, 2020 Board Meeting and the Board considers the final budget and levy for certification on September 10, 2020.

If there are questions in advance of the meeting, please contact James Wisker at <a href="mailto:Jwisker@minnehahacreek.org">Jwisker@minnehahacreek.org</a>.

# **2021 BUDGET & WORKPLAN**

# IN PURSUIT OF A BALANCED URBAN ECOLOGY

We believe that clean water and a healthy natural environment are essential to creating and sustaining vibrant, thriving communities. The beauty, green space, and recreational opportunities found in the Minnehaha Creek watershed create a sense of place that provides a local identity, adds economic value, and increases well-being.

We put this belief into action by partnering with our communities to integrate the natural and built environments across the watershed. In pursuing these partnerships, we focus in areas of high need to achieve significant, measurable improvements, while remaining responsive to needs and opportunities watershed-wide.

This approach allows us to remain focused for greater effectiveness while maintaining the flexibility to respond to significant opportunities created through land use change.

# **OUR 2021 PRIORITIES**

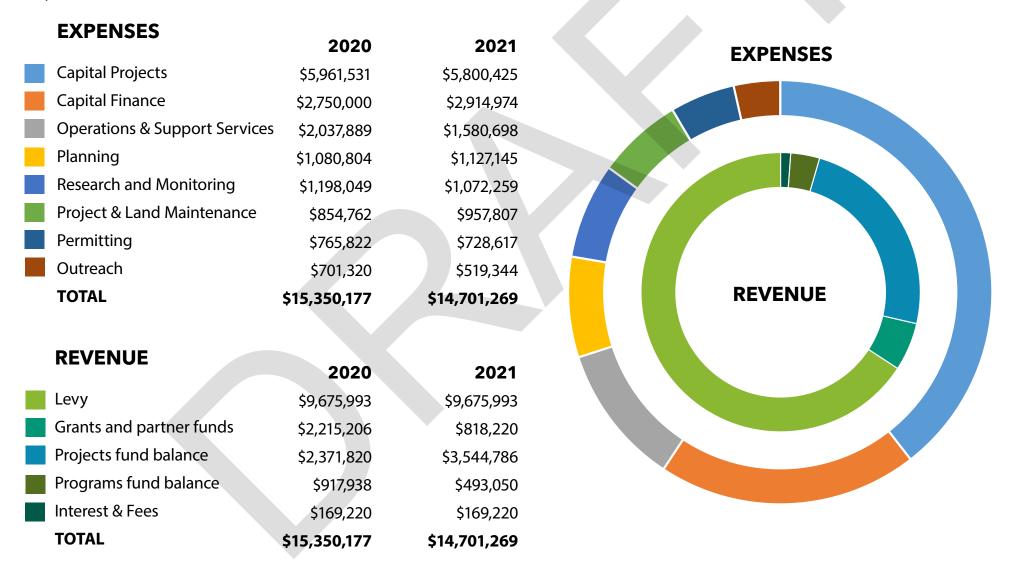

- **High-impact capital projects:** A majority of the budget will fund projects that improve natural resources, provide economic value, and support thriving communities
- **Ecological balance:** Our work throughout the watershed will continue to support ecological integrity and balance the natural and built environments to improve water quality, water quantity, and resilience
- Responsiveness: MCWD will continue to provide added value to communities across the watershed by gathering robust data, providing technical assistance, and identifying opportunities to support the projects and initiatives of our partners for mutual benefit
- Improved customer service and efficiency: Improvements to our permitting process, technology, and facilities will help improve staff's ability to provide excellent customer service to our residents

# 2021 BUDGET BREAKDOWN

# **FISCAL RESPONSIBILITY**

Our work is supported by an annual tax levy, funds levied in past years for multi-year projects (assigned funds), funds reallocated from projects and programs delivered under-budget, grants and partner funds, interest, and reimbursement of permit fees.

For the fourth consecutive year, there will be no increase in our tax levy in 2021. We will receive approximately \$818,000 in grants and partner contributions.

# WATERSHED-WIDE SERVICES

In our commitment to serve partners and residents across the watershed's 178 square miles, we provide a variety of services that assist them in our clean water work. We also remain flexible to respond to opportunities to protect and improve natural resources that are created through land use change and partner initiatives.

### **SERVICES:**

- Monitoring & Assessment: Collecting and analyzing data across the watershed to identify resource needs to inform planning and implementation.
- Planning and Technical Assistance: Collaborating with cities, landowners, and others to identify the most effective strategies to meet partners' goals and improve water quality and ecological integrity
- Project Support: Working with public and private partners to support projects that restore and improve water quality and ecological integrity and that are well coordinated and align with MCWD goals, exceed regulatory requirements, and create mutual benefits.
- Permitting: Reviewing and overseeing construction
  activities, in coordination with our communities, to protect
  natural resources from degradation that can occur as a
  result of land use change. In 2021, we will be coordinating
  with our cities and partners to improve the permitting process.
  - with our cities and partners to improve the permitting process, generating opportunities for win-win partnerships and enhancing customer service.

Project Maintenance and Land Management: Maintaining our projects and land to ensure their continued function and value, and
managing the operation of Gray's Bay Dam to balance the water budget throughout our 178-square miles and reduce the risk of flooding

# SIX MILE CREEK - HALSTED BAY SUBWATERSHED

### **OVERVIEW**

The Six Mile Creek - Halsted Bay Subwatershed is a complex system of 14 lakes connected by Six Mile Creek and thousands of acres of wetlands that form the headwaters of Lake Minnetonka and the Minnehaha Creek watershed. Five of the lakes are on the state's impaired waters list, and Six Mile Creek flows into Halsted Bay, the most degraded bay in Lake Minnetonka.

This subwatershed is experiencing rapid development, which presents a unique opportunity to join with our partners to plan for sustainable growth. This integration of land-use change and our natural systems is central to our approach.

The Six Mile Creek - Halsted Bay Subwatershed Plan, created in collaboration with our partners, is a vision to improve water quality and enhance natural resources across the subwatershed through value-added partnerships. In addition to restoring and protecting natural resources, the plan identifies opportunities for enhancing public access to the area with trails, signage, and engagement opportunities.

To date our work has leveraged \$1.2 million in outside capital and, by the end of 2021, is projected to have reduced nutrient loading by 545 pounds per year, created 190 acres of publicly accessible green space, protected 124 acres of wetlands, and reduced common carp populations in all 14 lakes in the system by a total of 142,000 pounds.

# **STRATEGY**

We are addressing subwatershed impairments, improving habitat, and protecting high value resources by:

- **Managing carp** to restore 2,488 acres of deep and shallow lake habitat and to set the stage for future restorations
- Targeted wetland protection and restoration to address external phosphorus entering lakes, the creek, and Halsted Bay, while establishing habitat corridors that connect to uplands
- **Identifying stormwater management opportunities** in partnership with cities and developers to address pollutants entering Six Mile Creek, lakes, and wetlands
- Controlling in-lake nutrients originating from historical impacts to reduce the amount of phosphorus being released from lake bottoms

# SIX MILE CREEK - HALSTED BAY SUBWATERSHED

# **WORK TO DATE**

Work to date has included restoration of a 20-acre wetland in Victoria in partnership with a private developer, restoration of 160 acres of the Six Mile Marsh Prairie, a rigorous study to identify specific opportunities to decrease phosphorus pollution to Mud Lake and Halsted Bay downstream, invasive carp management strategies throughout the subwatershed, and leveraging Clean Water Funds to retrofit stormwater ponds in the City of Victoria to exceed regulatory standards and address nutrient loading to an impaired water body. Most recently, we partnered with the City of Victoria on the design and construction of Wassermann Lake Preserve, a park and restoration project that restores native upland and shoreline habitat, reduces nutrient and sediment loading to Wassermann Lake through alum treatment on a six-acre pond and the restoration of an intermittent stream channel, and creates the City's first nature-based park.

# **2021 ACTIVITIES**

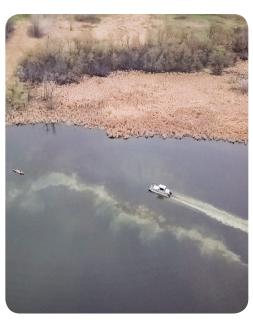

#### WASSERMANN INTERNAL LOAD MANAGEMENT

The benefit of sustained focus on a system is that most significant water challenges require multiple solutions. In the case of Victoria's Wassermann Lake, which is considered impaired for nutrient loading, MCWD has worked with land use partners on a multi-year strategy to return the lake to a sustainably healthy state. This work has included wetland restoration, carp management, treatment in a connected pond, and extensive habitat restoration.

Now, "internal loading" — the release of nutrients from the lake bottom into the water — remains the final significant source of nutrient pollution in the lake. To address this, we secured a \$284,720 competitive grant from the Board of Water and Soil Resources Clean Water Fund to prevent this internal loading through a process known as "alum treatment," which uses aluminum sulfate to bind to phosphorus particles and trap them in the lake bottom. The project will reduce internal phosphorus loading by an estimated 90 percent, significantly increasing the health and clarity of the lake while moving it close to the required reduction needed to remove it from the state's impaired waters list.

### SIX MILE MARSH PRAIRIE RESTORATION TRAIL

In 2013, we restored 160 acres of steeply-sloped agricultural land in Minnetrista into prairie and oak savanna — keeping 180 pounds of phosphorus per year from draining into Six Mile Creek just before it enters Halsted Bay.

An alum treatment occurring at Wasserman West pond, connected to Wasserman Lake, in 2019. In 2021 we will treat Wassermann Lake itself with alum to address internal nutrient pollution.

Now known as the Six Mile Marsh Prairie, this property has transformed into a beautiful natural amenity dotted with wetlands, wildlife, and scenic views overlooking the creek and Lake Minnetonka. To further enhance the site, we're working with the Three Rivers Park District to connect the site to the nearby Dakota Rail Trail, allowing users to explore and enjoy this revitalized space.

# MINNEHAHA CREEK SUBWATERSHED

### **OVERVIEW**

Minnehaha Creek is the outlet for the entire watershed, flowing nearly 23 miles from Lake Minnetonka and collecting stormwater from Minnetonka, Hopkins, St. Louis Park, Edina, Richfield, and Minneapolis, through the chain of lakes and into the Mississippi River.

The creek suffers from a number of issues, including:

- flashy water levels and flooding
- ditched, straightened, and fragmented stream channel
- lost, impacted, and fragmented riparian corridor
- polluted stormwater runoff from hundreds of storm sewers
- impairments for *E. coli*, chloride, dissolved oxygen, fish and macroinvertebrates
- transportation of nutrients that degrade water quality in Lake Hiawatha (impaired) downstream

To improve water quality and resilience, we have developed strong relationships and momentum with the cities of Hopkins, St. Louis Park, Edina, and Minneapolis to integrate natural resource goals with park planning, community development, and infrastructure improvements.

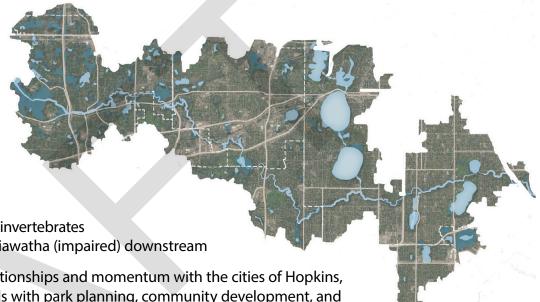

We will address subwatershed impairments, reduce regional flooding, and improve habitat by:

- Managing regional stormwater to slow down water, reduce runoff and pollution entering the creek, and decrease flood risk
- Restoring the creek to stabilize streambanks, slow down water, and improve in-stream habitat and buffers, while increasing opportunities for public access and economic development
- Restoring and connecting ecological corridors to maximize green space, improve habitat and flood storage, and strengthen resilience

# **WORK TO DATE**

2021 activities will build on past work to restore what had been the most degraded section of Minnehaha Creek in St. Louis Park and Hopkins, an area now known as the Minnehaha Creek Greenway. Working in partnership, we are restoring the creek to reconnect people to this valued resource and improve water quality and resilience throughout the corridor.

Past projects include re-meandering sections of the creek that were previously ditched and straightened, creating new public access, implementing stormwater management in St. Louis Park, revitalizing Cottageville Park in Hopkins, restoring the creek through Arden Park in Edina, and repairing eroded stream banks in Minneapolis. This work has resulted in 60 acres of newly accessible green space, 28.7 acres of restored wetlands, over 150 pounds of phosphorus removed per year, 3.2 acre feet of floodplain storage, and 1.4 miles of restored creek.

# MINNEHAHA CREEK SUBWATERSHED

# **2021 ACTIVITIES**

### 325 BLAKE ROAD STORMWATER FACILITIES

A former industrial site along 1,000 feet of Minnehaha Creek, the property at 325 Blake Road is a key piece of the Minnehaha Creek Greenway. In 2021 we will begin converting four-to-six acres of the property into a series of stormwater treatment features that will treat polluted runoff from 270 acres of the surrounding region, reduce phosphorus loading by 181 pounds per year, and connect the Minnehaha Creek Greenway trail system between Cottageville Park and the Minnehaha Creek Preserve. The remainder of the 17-acre site will be redeveloped in partnership with the City of Hopkins. The project is supported by \$2.4 million in outside funds from Hennepin County, Metropolitan Council, Public Facilities Authority, and Clean Water Legacy Fund.

### STREAM ENHANCEMENT AND TRAIL CONNECTION

When completed, the Southwest LRT line will run through the heart of the Minnehaha Creek Greenway and provide yet another important community connection to this revitalized corridor. In partnership with the City of St. Louis Park, we're taking advantage of the construction period to make a key connection in the Minnehaha Creek Greenway trail system that will link upstream and downstream investments together and connect them to the Cedar Regional Trail, as well as streambank improvements along the construction corridor.

# MINNEHAHA CREEK PARKWAY WATER RESOURCE IMPROVEMENTS

The Minneapolis Park and Recreation Board, in coordination with the City of Minneapolis and MCWD, is leading an ambitious 30-year envisioning of the Minnehaha Creek Regional Trail system through the parklands of south Minneapolis. We're working closely with these agencies and community members to integrate regional stormwater management solutions and creek restoration into this once-in-a-generation overhaul, a rare opportunity to make significant water quality infrastructure and ecological improvements in a developed area.

# **ACTIVITY SPOTLIGHT: HARNESSING DATA ANALYTICS**

# **OVERVIEW**

MCWD is a science-driven organization: a trusted broker of scientific information and data to drive decisions about where to focus and how to improve the condition of the watershed.

Like many other fields, advances in data science and computing technology have radically reshaped the ways watershed data can be collected, analyzed, and shared. In 2021 we are continuing a multi-year investment in our data analytical tools to take advantage of these advances to better inform planning, decision making, and communication with partners and the public.

### **COLLECTING DATA WITH REMOTE SENSING**

In 2021 we will continue to build out our network of remote sensors, known as RESNET, which provide real-time data on water level, flow, and pollutant loading throughout the watershed. These sensors will provide 1.3 million data points per year on our water system, up from about 520 data points produced by traditional in-person monitoring.

### ANALYZING DATA WITH ADVANCED MODELING

[NOTE for publication draft: This grant application is pending. This section may change based on the grant award decision.] Real-time sensor data is one of several important new data sets that have become recently available for helping understand and predict how water moves through the complex watershed system. Statewide investment in mapping topography and soils allows for a new understanding of how water moves across the landscape and infiltrates into groundwater, and the widespread digitization of storm sewer networks shows how water flows through developed pipe systems.

With an \$883,000 grant from the Legislative-Citizen Commission on Minnesota Resources, we are integrating these newly-available datasets into a first-of-its-kind planning tool that will use advanced modeling and machine learning to predict and understand our watershed system in unprecedented detail. This will allow MCWD and our partners to better implement projects, manage flooding, and become more resilient in the face of changing precipitation patterns.

### **COMMUNICATING DATA WITH A REDESIGNED WEBSITE**

In 2021 we will release a new website, re-built from the ground up to provide excellent customer service for residents and partners. Planned features include an online permitting portal, real-time water conditions, and information about the District's past, current, and future work that matters to users.

Attachment 2 - DRAFT 2021 Operations and Programs Summary by Fund

Attachment 6 - DRAFT 2021 Outreach Budget Summary

Outreach									
2020 Activity/Expense	Expenditures C				2021 Activity/Expense	2021 Budget		2020-2021 dget Change	
Minnehaha Creek Subwatershed									The strategic outreach plan approved by the Board in February establishes a new set of guiding principles, priorities, and staffing for the
Greenway	\$ 54,081	. \$	41,481	\$ 12,600			\$		Outreach program. The budget has been restructured to reflect the implementation plan.
Arden	\$ 9,300	) \$	9,300	\$ -			\$	(9,300)	
Minneapolis	\$ 13,000	) \$	-	\$ 13,000			\$	(13,000)	
Gray's Bay signage	\$ 8,000	) \$	-	\$ 8,000			\$	(8,000)	
Six Mile Creek-Halsted Bay									
Subwatershed									
Communications	\$ 39,000	) \$	34,000	\$ 5,000			\$	(39,000)	
Engagement	\$ 19,000	) \$	19,000				\$	(19,000)	
Signage	\$ 12,000	\$	16,000				\$	(12,000)	
					Supporting High-Impact Interpersonal Outreach	÷ 20,000			The Strategic Outreach Plan recognizes that MCWD's most impactful outreach activities are interpersonal, context-specific, and delivered by MCWD relationship managers. The plan calls for the Outreach program to prioritize time and resources to ensuring the success of these high-impact outreach events through preparation, supporting materials, de-brief, and tracking.
					Communications advisors				As-needed consultation on matters such as crisis communications, media relations, grants
					Subject matter experts			,	Engineers, hydrologists, etc., to inform messaging and strategy for critical outreach event: Consultant support to create high-impact outreach items (e.g. design, video, animation, 3D printing, VR
					Creators  Government relations				Relocated from General Operations fund
					Government relations	30,000	Ş	30,000	Relocated from General Operations fullo
					<b>Campaigns for Key Initiatives</b> Events	\$ 15,000	ė		The program will continue to use traditional Outreach tools to support MCWD. These activites will be dictated by custom outreach plans developed to directly support the strategic context of a number of key intiatives. In 2021, we anticipate those key intiatives to be: Permitting program improvements; 2D model and machine learning build (pending LCCMR funding); 325 Blake Road; Long Lake Creek implementation roadmap; Minnehaha Creek Parkways visioning in south Minneapolis; and an overall campaign in the Six Mile Creek-Halsted Bay subwatershed.  Input sessions, open houses, tours, media events
					Events	\$ 15,000	Ş	15,000	imput sessions, open nouses, tours, media events
					Producing and distributing materials	\$ 20,000	خ	20,000	Publications, fact sheets, videos, storymaps
					Programming	-			Signage, branding, activities (includes planned signage for Gray's Bay dam and Six Mile-Halsted)
					Data collection				Community surveys, power mapping, usage tracking
					Volunteer Engagement				Trainings, materials, supplies
Watershed wide programming					Broad-based Outreach				The program will maintain some limited broad-based Outreach in order to maintain brand awareness, connect people to information they value, and provide transparency and customer service.
District-wide communications			10,950		District-wide publications				Annual newsletter, mid-year highlights, budget publication
Website copywriter/photographer	\$ 28,000	) \$	-	\$ 28,000	Website copywriter/photographer		_		Copywriting for website re-build (carried over from 2020)
		1			Broad-based engagement	\$ 10,000	\$		Metro Watershed Partners/Adopt a Drain, District-wide training
Stormwater education	·	\$	16,800				\$	(24,400)	
Watershed Association Initiative				\$ -			\$	-	
Master Water Stewards program		_	5,000				\$	(5,000)
